ESPAÑOL

ITALIANO

Thank you for choosing a Line Magnetic product. Its implementation has been our know-how, both in terms of design to the manufacturing. Electronic components and mechanical parts correspond to the selection criteria of very high quality. Operation and finish of each product have been checked before delivery. To obtain best results, please read the advice contained in this document.

Please read this manual carefully before installation and operation.

In order to prevent damage during transportation, the amplifier and its tubes are packed with protective foam, please remove these foam pieces before operating your amplifier to avoid any risks!

WARNING

Make sure that the device is not plugged into the mains before making any connections. It is also recommended to turn off or disconnect all other devices associated while making connections to the product.

Keep all packing materials for future use and please fill in the warranty card for registration of warranty.

Please make sure that your local voltage is the same as indicated on the rearpanel. A too low or too high voltage can cause serious damage to your amplifier. In case you find an improper voltage, please contact our company or your local dealer.

Package content

1x LM-512CA
2x Fuses
1x Detachable power cord
1x This user manual
1x Remote control

ENGLISH

Product features

- Excellent quality of wide frequency of Input output transformer. Four pieces made of Nickel are used for input output signal coupling.
- Double EI type of power transformer for power supply. Separate power transformer for Left and Right channel.
- In the preamp stage 6KZ8 has been used for voltage amplification, 6922 has been used for driver stage while American RCA 22DE4 has been used for high voltage rectification.
- Separate design for Left and Right channel for balance and better performance.
- Superior components have been taken for the preamplifier: Multicap capacitors, American IRC resistors, Philips BC Axial Capacitors, Panasonic Relay, CMC Gold-plated Tube sockets, Excellent RCA Terminals, Balance Socket.
- Elegant front design to show the concept of High-end products.
- Soft-start circuit around 30 seconds.
- Metal and removable tube guard cage.
- Infrared Remote control.

Specifications

Power output: 45W	Working conditions: Temperature: 0°C to 40°C Moisture: 20% to 80%
Frequency response ($\pm 1,5\text{dB}$): 15Hz-30KHz	Storage conditions: Temperature: -20°C to 70°C Moisture: 20% to 90%
Input sensitivity: 1000mV RCA: 150mV	THD: 0,5% S/N ratio: 90dB
Dimensions (W x H x D): 430 x 383 x 196 mm	Input impedance: 600k Ω
Tubes: 6KZ8 (Mullard), 6922 (Genalex), 22DE4 (American RCA)	Net weight: 20kg
Power requirements: 230V $\pm 5\%$ (50Hz)	Power consumption: 45W

Safety instructions

We invite you to read the instructions on the proper use of your product carefully. They will ensure the proper functioning of the latter and it safely.

- Do not use this device in a wet area, near water, do not expose to rain or moisture.
- Do not place any objects filled with liquids such as vases or some others on the top or around.
- Do not move the product if it has just been used or if it is still hot.
- Do not install near heat sources. To avoid being overheated please keep the unit's ventilation open.
- Never cover the ventilation of the unit.
- Amplifier should install steadily and make sure all four feet are on the same level.
- Keep the amplifier in 15 cm's distance to the surrounding walls.
- Temperature will become higher after working in long period of time and please keep the unit's ventilation open and install the amplifier at a well-ventilated place to avoid troubles and fire hazard.
- Clean only with a dry cloth. As a precaution, it is best to unplug the unit before handling and ensure the heat generated by the product has been properly dissipated.
- Please move the amplifier carefully not to drop the unit or be subject to other strong shocks.
- Unplug the power cord if you are not going to use the product for an extended period of time or during lightning storms.
- Take great care of electrical connections (power cord and plugs). In particular, do not walk on, or press the power cord, specifically at plugs, power plant and the output of the power supply.
- Be sure to use an appropriate power supply to the power jack on the unit outlet. Especially if the device is equipped with a ground plug, it is necessary to use it.
- Forbidden to operate as unloaded.
- Forbidden to operate when the output is open or shorted.
- Do not attempt to service this product yourself. Opening the cover may expose you to dangerous voltage or other hazards.
- Use only spare parts and accessories recommended by Line Magnetic.
- We are not responsible for any problems caused by checking and opening without permission of our company. For service, please contact a local dealer or qualified service technician.

Recommendations

Input voltage level of the amplifier is 230VAC $\pm 5\%$ and please make sure that your local voltage is the same as indicated on the rear panel. A too low or too high voltage can cause serious damage to your amplifier. In case you find an improper voltage, please contact our company or your local dealer.

With headphones, do not use it to excessive noise. Otherwise, prolonged listening at high volume levels may cause permanent damage to your hearing.

When disposing of used batteries, please comply with governmental regulations or rules defined by the public statements relating to the environment applicable in your country.

Never expose the batteries (battery pack or batteries installed) to excessive heat such as sunshine, fire, etc ...

Recycling product

At the end of its useful life, this product should not be disposed of with regular garbage, but returned to a collection point for the recycling of electrical and electronic components. This point is emphasized by the symbol on the product, the instruction manual and on the packaging.

The materials can be reused in accordance with their markings. Through reuse and recycling of raw materials or any other form of recycling, you make an important contribution to environmental protection. Your municipality can tell you where is the point of the nearest collection site.

ENGLISH

Glossary

This symbol alerts the user to the presence of «dangerous voltage» uninsulated which may pose a risk of electric shock to the user.

This symbol alerts the user that the documentation that comes with the device contains important instructions for maintenance and proper use of the product.

The CE mark indicates that this product complies with European directives called «low voltage» (2006/95/EC), Electromagnetic Compatibility (2004/108/EC) and apply eco-design requirements for energy products (2009/125/EC) when the appliance is installed and used in accordance with the user manual.

For continued compliance only Line Magnetic accessories must be used with this product and servicing must be performed by specialized and qualified staff.

The WEEE symbol is that of the European Union regarding the recycling of electrical and electronic equipment. It indicates that this product contains electrical and electronic components that can be reused, recycled or recovered. Therefore this product should not be disposed of in your regular trash. Thank you to return the unit or contact your authorized dealer for more information.

Location and precautions

Avoid placing it in direct sunlight or near a heat source. No source of light shall be placed on the apparatus. Also avoid all sources that could cause vibration, dust, cold or moisture. The recommended ambient temperature range is 5-35 °C.

The device must be installed on a stable, level surface. Do not place the unit on an unstable surface or shelf. The unit may fall, causing serious injury to a child or adult as well as serious damage to the product. Do not place other equipment on top of the unit.

Due to stray, turntables or CRT TVs magnetic fields should not be located near the unit to avoid possible interference.

Power sources

The unit should be operated only from the type of power source indicated on the label. If you are unsure of the type of power available to you, thank you to contact your dealer or the company responsible for the power supply in your area.

Turn off device if you do not intend to use this unit for a long time.

In case of prolonged absence from home, it is recommended to unplug from the electrical outlet.

Make sure each cable is correctly inserted. To prevent hum or background noise, do not mix different other antenna cable with the power cord or speaker wires.

Warranty

Keep all packing materials for future use and please fill in the warranty card for registration of warranty.

Your Line Magnetic product is covered by the legal warranty in force in your country. You may also have other rights which vary from country to country, state to state.

The guarantee of the product is linked to the exclusive use of tubes supplied by the official distributor and in accordance with the assembly technical specifications.

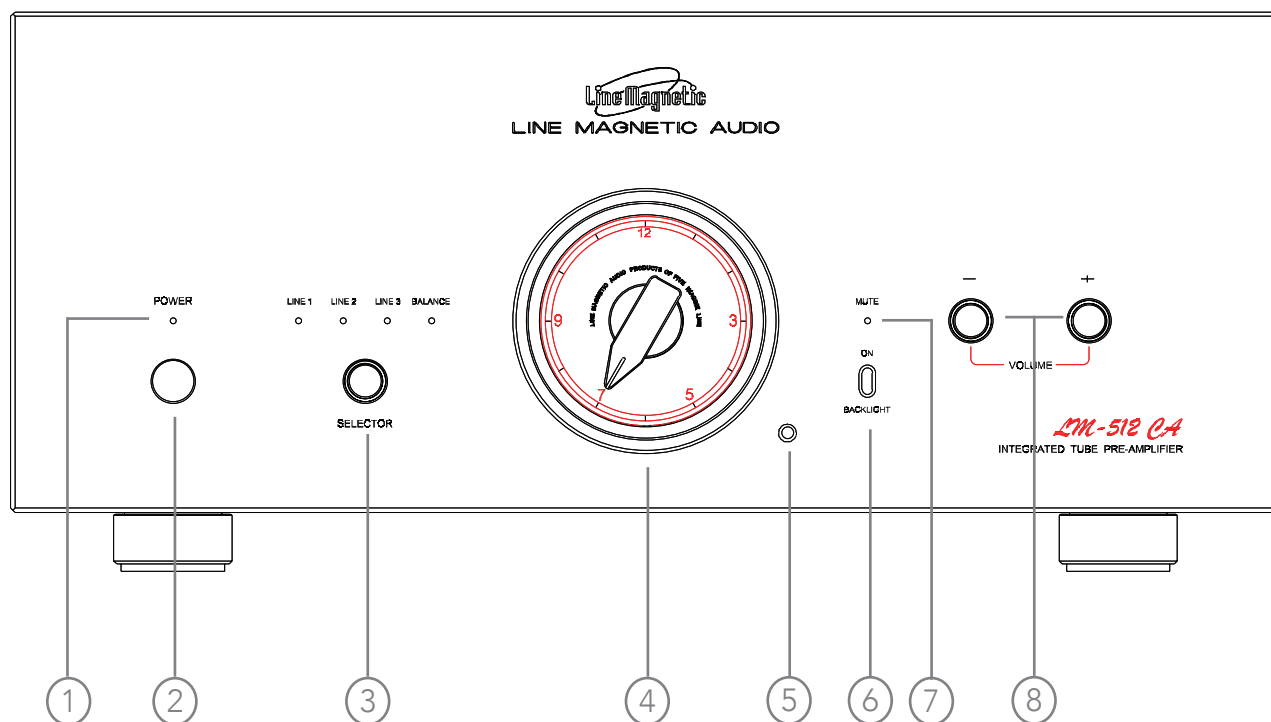

In addition, you benefit from a commercial guarantee offered by BC Diffusion on the products Line Magnetic.

For details on this warranty, please refer to the information available on www.line-magnetic.eu.

Functions descriptions

Input voltage level of the amplifier is 230VAC $\pm 5\%$ and please, make sure that your local voltage is the same as indicated on the rear panel. A too low or too high voltage can cause serious damage to your amplifier. In case you find an improper voltage, please contact our company responsible for the power supply or your local dealer.

Front panel

- ① Operation: Indicate the state of the amplifier. Orange means operation and if turning on it will twinkle for 30 seconds during the time delay.
- ② Power: ON/OFF. Turn on or turn off the amplifier.
- ③ Input Selector: Source selection among LINE1, LINE2, LINE3, and Balance (XLR).
- ④ Volume knob: This volume knob adjusts the output volume of the amplifier sent to the loudspeaker. Volume up to the right while volume down to the left.
- ⑤ IR remote sensor: React according to the orders of the remote. It is essential that there are no obstacles between the remote control and the sensor.
- ⑥ Switch for controlling the volume decoration light.
- ⑦ Mute Indicator: It is normal operation mode if it keeps lighting or flashes for Mute Mode (Mute from remote control).
- ⑧ Volume up and down buttons.

Rear panel

- ① Ground Terminal.
 - ② Signal input: Inputs (RCA plugs) are for connecting a «line level» source to your amplifier. It is designed to receive an «analog» signal (as opposed to «digital» signal). To connect your source we are using a traditional «RCA» cable, they are usually identified by a color code «RED» to the RIGHT channel and «WHITE» to the LEFT channel. (LINE1, LINE2, LINE3, RCA Input Terminal).
- Important Note:** Check the impedance of your speakers. BE SURE TO USE THE MATCHING TERMINALS.
- ③ Balanced phase selection: The balanced phase selection allows to choose between American phase and British phase input Mode.
 - ④ XLR Balanced Input socket.
 - ⑤ RCA Output socket.
 - ⑥ RCA Output or Balanced Output selection: If you are choosing RCA output, the signal does not go through output transformer and no audio signal from balanced output socket.
If you are choosing Balance output the RCA output signal will go through the output transformer and there is audio signal from Balance output socket.
 - ⑦ XLR Balanced Output socket.
 - ⑧ Power socket with main fuse: Main fuse is located on the rear of the amplifier just below the power cord socket. Replace with the same type and value fuse.
Once all connections to the amplifier have been made, connect the power cable to an electrical outlet and turn on the unit as it is ready for operation.

Audio connection

Connect other audio equipment to your amplifier

This is a standard way, connect the main equipment of LM-512CA method.
Use a RCA (Cinch) stereo audio cable (red and white plugs) to connect your sources.

- 1- During installation please always refer to other product's operation manuals.
- 2- Please do not insert the power cord into the main socket only if all other sources are well connected.
- 3- «R» refers to the Right channel while «L» represents the Left channel.
- 4- Please take the right guidance for connection as wrong connection may cause noise or low grade function.
Do not also fasten signal cables together with other cables just like the power cables to avoid disturbance.

Connection of the power cord

Connect the speaker cables and signal cables first and then plug the power cord into the power socket.
Your amplifier is now ready for operation.

Turning on

IMPORTANT - BEFORE TURNING ON THE AMPLIFIER

Make sure all connections (first, connect the speaker cables, then the cables from your sources, and plug the power cable into the AC outlet) are valid, and the stability of your power supply AC 230V - 50Hz.

Please make sure corresponding voltage is the same as required. We are not responsible for damage caused by misuse of unsuitable voltage.

Startup procedure

- 1- Set the VOLUME of the amplifier to zero (potentiometer totally on the left).
- 2- Switch the amplifier to ON position via the POWER switch located on the side of the amplifier.
The LED lights up in orange on the front panel of the amplifier. It indicates that the amplifier is working.
- 3- After 30 seconds, the orange led blinking will stabilize to indicate that the amplifier is ready for use.
- 4- Select the source you want to listen to with the SELECTOR button located to the right of the front panel.
- 5- Adjust the VOLUME knob as you like to enjoy your music.

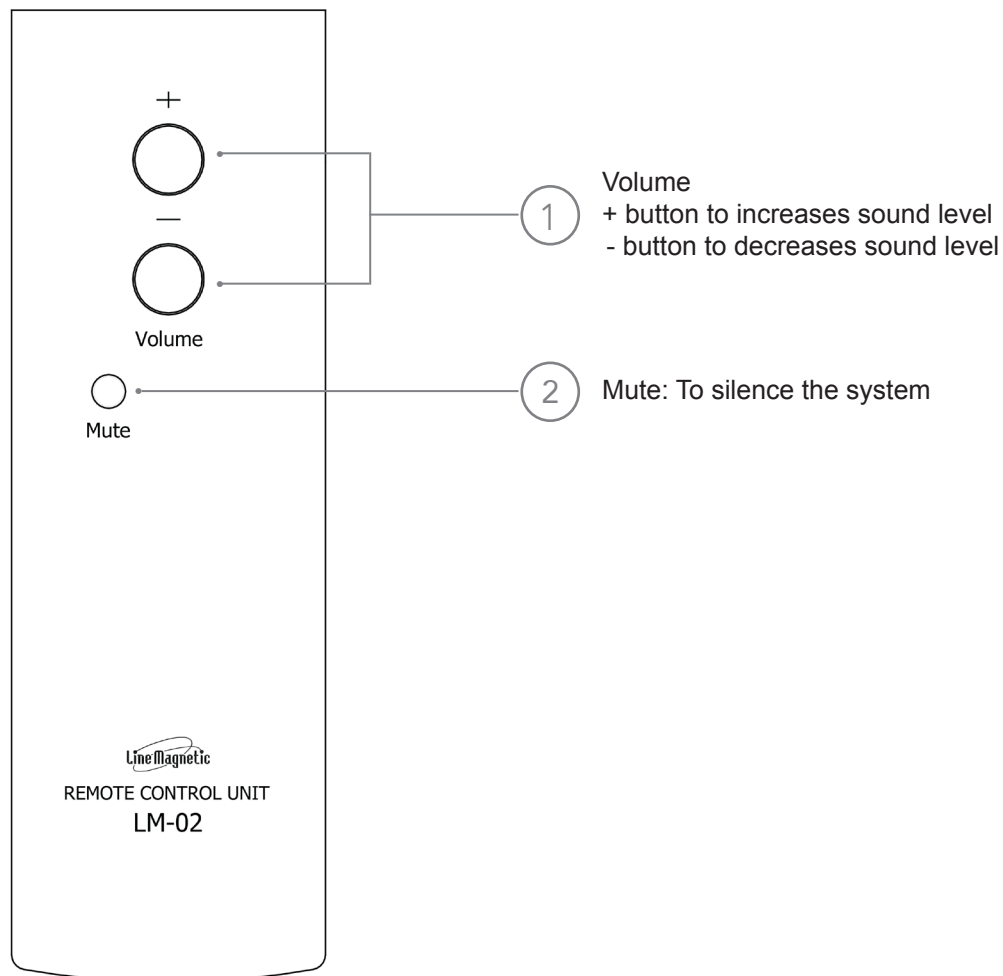

General observations

- It is normal that power transformer becomes hot for extended period of operation.
- Unplug the product during lightning storms or when not in use for a long time.
- To prevent damage to the amplifier never disconnect the speaker cables while the unit is ON.
- In order to protect the tubes please re-switch on the amplifier after turned off in two minutes.
- This product is designed and manufactured with our original parts for reaching the best results. We are not responsible for problems and damages caused to the amplifier by non-original replacement parts.
- Line Magnetic Audio reserves the right to change specifications at any time without further notice in advance if products are upgraded. Specifications on the manual only show the specifications of the amplifier you've bought.

WARNING : Please make sure corresponding voltage is the same as required. We are not responsible for damage caused by misuse of unsuitable voltage.

Remote control

The Preamplifier comes with LM-02 remote control.

Installation and replacement of the batteries

Installation

1. Remove the screws of the remotes back cover.
2. Insert two 1,5V AAA batteries using the + and - indicators to insert them in the correct position.
3. Screw the batterie cover back into place.

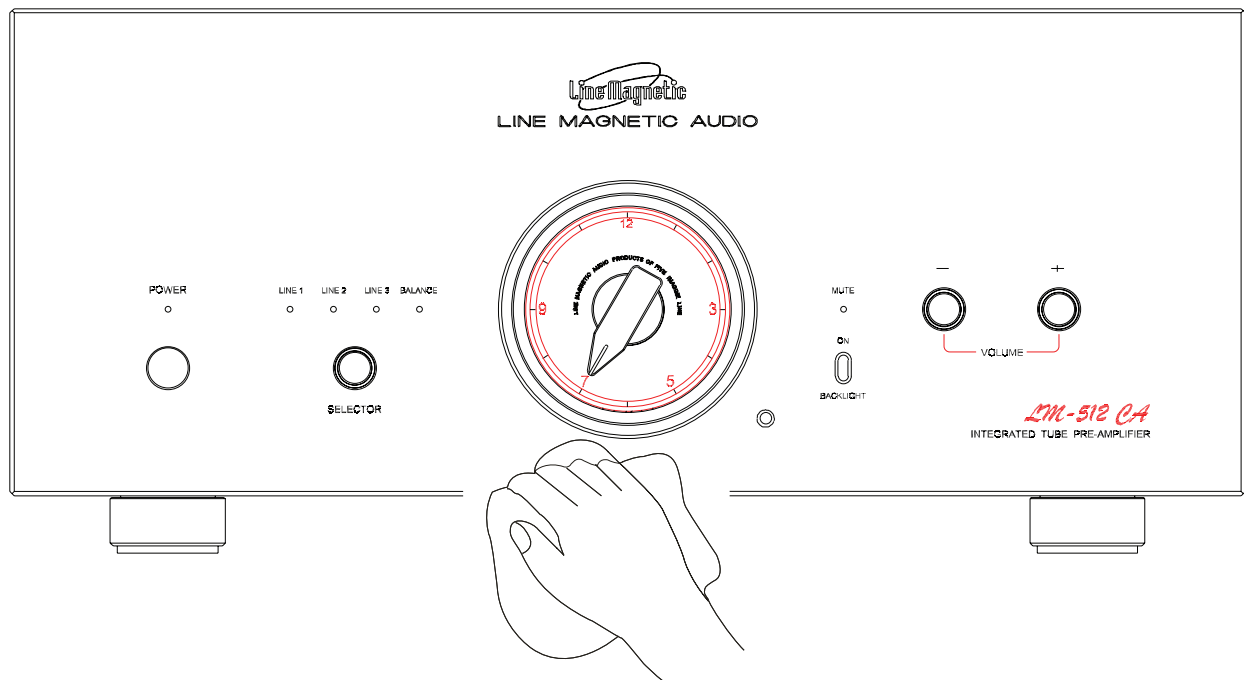

Replacement of the batteries

- When the batteries are low, please replace them with new ones.
- Do not mix the new batteries with old ones.
- Please use high quality batteries, these can prevent leakage of electrolyte.

Tube replacement

Basics tubes	Common replacements
6KZ8	-
6922	ECC88, E88CC, CV2492
22DE4	-

Maintenance

WARNING

As a precaution, it is best to unplug the unit before handling and ensure the heat generated by the product has been properly dissipated.

Cleaning

1. Use soft dry cloth to clean the amplifier.
2. Refer to the safety precautions if you are going to use chemically treated cloth for cleaning.
3. Use a soft cloth with neutral detergent first and then wipe with a dry cloth.

Troubleshooting

Please follow the instructions in this manual to keep the amplifier working in a reliable and safe manner. Sometimes problems could be caused by other related equipment, please check the connections.

If you experience a problem with this unit, please check the following items before requesting service. If it still does not operate correctly, contact the retailer where you purchased the unit.

For repair, during or after the warranty, please contact your local dealer.

Problem	Cause	Solution
Power LED is OFF.	Power cord is not well-connected.	Please check the power cable connection or power outlet connection.
	Main fuse is out.	Replace with the same type and value fuse.
	Troubles of inner parts or components.	Please contact your local dealer.
Power LED is ON.	Volume is at zero.	Turn up the Volume.
	No signal input.	Check the function of the sound source.
		Check the input connectors and/or switch to the proper input
Sound distortion.	High input signal level.	Turn down the volume to suitable position.
		Replace the signal input cable.
Noise output.	Ground of input signal cable is open or bad contact of the input signal cable.	Replace the input signal cable with a new one.
	Components or circuits are in trouble.	Please contact your local dealer.
Stereo image is not so good.	Signal input cables or speaker cables are wrongly connected.	Reconnect it as suggested in the manual.
No reaction to the remote control.	Disturbed by external devices.	Keep away from the disturbance (ie: microwave oven) and restart the amplifier.
	Batteries of the remote control are low.	Please replace the batteries.
	Obstacle is located between the remote control and the amplifier.	Move the object that blocks the IR rays between the remote control and the IR sensor located on the front of the amplifier.

The LM-512CA has been designed and manufactured with parts that we manufacture to achieve an optimal result. We disclaim liability for potential problems or damage to the amplifier in the event of replacement of any of these original parts.

We are not responsible for any problems caused by checking and opening without permission of our company. For service, please contact a qualified service technician.
